

“LANDSLIDE RESEARCH AND RISK REDUCTION
FOR ADVANCING CULTURE OF LIVING WITH NATURAL
HAZARDS”

Ljubljana, Slovenia, May 29 – June 2, 2017 (Monday to Friday)

Open Session III
***“Landslide risk management, an integrated approach in
time”***

Time and location:

Friday, June 2 from 12:00 to 13:30 (lunch time), room Club CD, Forum venue (TBC).

Conveners / Facilitators:

Mitja Brilly, University of Ljubljana, Slovenia. E-mail: mitja.brilly@fgg.uni-lj.si.

Roberto Ranzi, University of Brescia, Italy. E-mail: roberto.ranzi@unibs.it.

Session objective:

To discuss how to integrate multi-disciplinary landscape management and landslide hazard by historical background.

Possible presentations themes for submission:

Using historical maps from past centuries we could recognise rural development through the time. The hydrological and hydromechanical condition change due the reforestation or deforestation, or natural afforestation, and changes in agricultural practice and growing crops, development of the forest roads and rural settlements.

Session structure:

- Presentation of some examples from Slovenia and Italy
 - Short presentations from invited speakers
 - Moderated Q&A discussion
-

Who should participate:

People interested in participating in relevant research initiatives on the session's topic are welcomed to attend the session with ideas to discuss.

Matjaž Mikoš, WLF4 Forum Chair
Dean of Faculty of Civil and Geodetic Engineering
Holder UNESCO Chair on Water-Related Disaster Risk Reduction
University of Ljubljana
